HR Department
TechNova Digital Solutions

Dear Hiring Manager,

I am writing to express my interest in the Junior Web Developer position at TechNova Digital Solutions. As an Informatics student at Universitas Ahmad Dahlan, I have a strong interest in web development and a passion for learning new technologies. I believe my technical knowledge and enthusiasm can make me a valuable candidate for your company.

During my studies, I have developed basic technical skills in HTML, CSS, JavaScript, PHP, and MySQL. I have applied these skills through university assignments and academic projects. One of my projects is an Online Student Admission website, which I developed to help prospective students access school registration information more easily.

Additionally, I worked on a Football Sentiment Analysis project using Python and the Naive Bayes method. This project helped me improve my programming, analytical thinking, and problem-solving skills.

I have not participated in an internship this semester because I have not had an internship opportunity yet. However, I continue to improve my technical abilities through academic projects and independent learning. These experiences have helped me understand how to develop applications and solve technical problems.

I am particularly interested in joining TechNova Digital Solutions because your company focuses on developing websites, mobile applications, and digital solutions. I am eager to learn, gain professional experience, and contribute to your team.

You can view myportfolio through the following link:

Thank you for considering my application. I would appreciate the opportunity to discuss my qualifications further in an interview. I look forward to hearing from you.

Sincerely,

Muhammad Kamil Ridho
